

BULLBERRY INSIGHT DISPATCH

Insight Dispatch is BullBerry Systems, Inc. new and extremely powerful mapped-ALI solution for Public Safety Agencies! We understand you expect the most powerful mapping application. A map is not just a map if you understand the power of Insight Dispatch. Built around ESRI's ArcGIS technology that exceeds your expectation!

All information is easily determined right in the map display, no need for a 9-1-1 dispatcher in an emergency to remember icons and GIS rules. The map is designed to be a self teaching tool so that anyone can effectively use the numerous tools that are available.

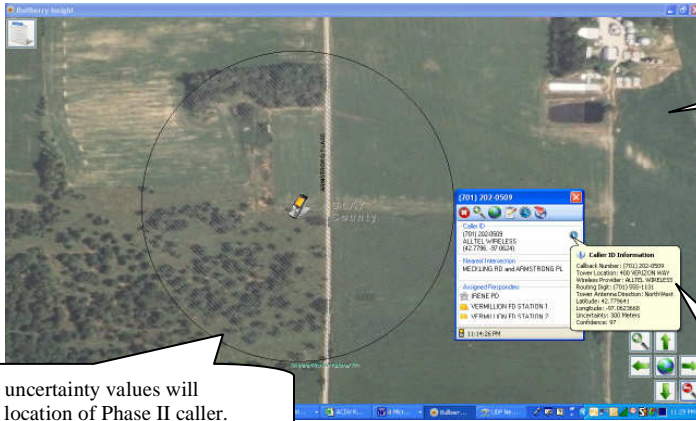

Insight Dispatch utilizes a SQL server technology to assure any data information required to be displayed on the map can be quickly and effectively presented. This unique design also allows Insight Dispatch to be more than just a digital map viewer in becoming an extremely powerful tool and critical part of the 9-1-1 call taking operation.

BullBerry Insight is the perfect design for the dispatch center and any applications that require an in-vehicle mapping solution.

BULLBERRY INSIGHT DISPATCH

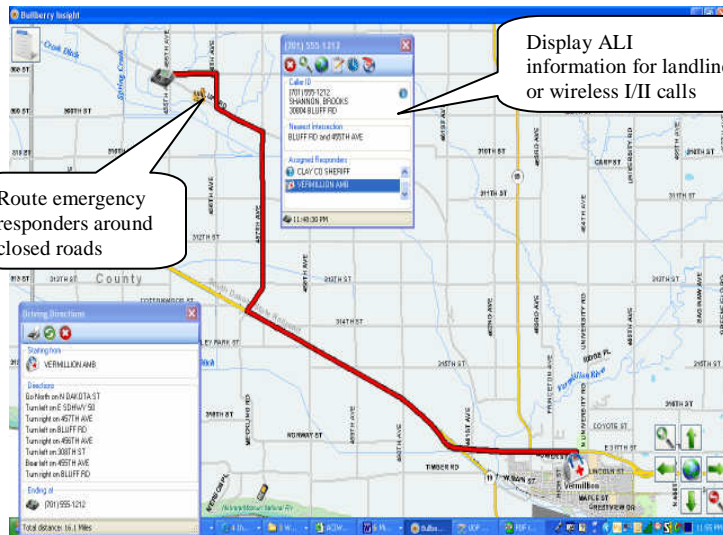

Orthophotos can be turned on or off with a click of a button

Wireless Phase II uncertainty values will display estimated location of Phase II caller.

Display critical information like wireless caller X/Y coordinated and telephone number

BullBerry Systems, Inc. has made routing a mainstay of the software since the inception of the company. With Insight Dispatch, that ability has greatly enhanced to utilize the wide array of functionality provided through ESRI's Network Analyst engine. Easily fax, print, and email direction for all emergency responders.

Display ALI information for landline or wireless I/II calls

Route emergency responders around closed roads

BullBerry Insight is designed to assure that any data information required to be displayed on the map can be quickly and effectively presented. This unique design also allows the Insight product to be much more than just a digital map viewer and will become an extremely powerful tool and critical part of the 9-1-1 call taking operation.
