

BULLBERRY INSIGHT MOBILE

Insight Mobile is BullBerry Systems, Inc. is our newest in-vehicle mobile mapping software for Emergency Responders! The ability for first responders to have a true spatial analysis tool sets BullBerry Insight apart from other products on the market. Insight Mobile uses the most current ArcGIS technology to provide the highest level of functionality.

Insight Mobile is designed to use your own GIS data, not commercial GIS data that is used in other mobile mapping devices. That way when road changes occur in your area updates can be applied immediately.

Insight Mobile will determine the quickest route for emergency responders. Visually you will see the route and can one-touch the map to zoom to your location. Directions also presented on the map view along with distance to next road intersection. Insight Mobile can be installed on laptops, toughbooks, or MDT's.

BullBerry Insight Mobile is the perfect design for the in-vehicle navigation for emergency responders (law, fire, EMS, Emergency Managers, etc). The GIS/map data can be built by your own GIS staff or BullBerry Systems, Inc. can assist in the creation of the highly accurate GIS data.

BULLBERRY INSIGHT MOBILE

Orthophotos can be turned on or off with a click of a button

Law responders can click on map to place a marker to back to. It can also be used for assigning new addresses while in the field.

Easily open and close road and provide route around roads that are closed.

BullBerry Systems, Inc. has made routing a mainstay of the software since the inception of the company. With Insight Mobile, that ability has greatly enhanced to utilize the wide array of functionality provided through ESRI's Network Analyst engine. Insight Mobile will quickly recalculate your route if you travel off displayed route.

BullBerry Insight Mobile is touch screen capable.

Easily search by house number, resident name, telephone number, intersection, or x/y coordinated.

Display nearest intersection.

Also display address based on GIS data and X/Y location.

BullBerry Insight Mobile is designed to assure that any data information required to be displayed on the map can be quickly and effectively presented. This unique design also allows the Insight Mobile product to be much more than just a digital map viewer and will become an extremely powerful tool and critical part of the 9-1-1 call taking operation.
